DETAILED ACTION

Allowable Subject Matter

Claims 1-10 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a method for performing OTDR (a term of art meaning Optical Time domain Reflectometer, see page 1 of applicant's specification) measurement in an optical transmission system, wherein the method comprises, beyond the OTDR measurement itself, having the OTDR signal light that is transmitted from one end of the device to the other Raman amplified using the main signal light of the optical transmission system as pump light, in combination with the rest of the limitations of the above claim.

As to claim 7, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a method for performing OTDR measurement in an optical transmission system, wherein the method comprises, beyond the OTDR measurement itself, having the OTDR signal light that is transmitted from one end of the device to the other Raman amplified by using pump light for the main signal light of the optical transmission system, in combination with the rest of the limitations of the above claim.

As to claim 9, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a method for performing OTDR measurement in an optical transmission system including a first terminal station and a second terminal station, with an erbium doped fiber between the first and second terminal stations, where the OTDR signal light is transmitted from an OTDR in the first terminal station to the second terminal station, with the OTDR light remote pump amplified and Raman amplified using pump light for remote pump amplification that is transmitted from the first terminal station, in combination with the rest of the limitations of the above claim.

With further regard to the above, particularly claim 9, please see the applicants' arguments of record dated December 7, 2006 in response to the previous Office action of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Lyons whose telephone number is 571-272-2420. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory J. Toatley can be reached on 571-272-2800 ext. 77. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
